

Resuscitation Officer Program:

Comprehensive Training for Hospital Code Team Leadership

June 2 & 3, 2014

ECCU 2014 – Paris Hotel – Las Vegas, NV

**Equipment
and
Infrastructure**

**Training Code
Teams**

**Organizing
Mock Codes**

**Forming Code
Committees**

Dear Chief Medical Officer,

Patient Survival, Patient safety, Risk Management, Hospital Certification, Hospital Award Programs and Accountable Care depends on highly trained, coordinated, and documented cardiac arrest management.

This 12 hour Program will prepare your hospital physicians, nurses, respiratory therapists, and administrators to excel in resuscitation systems of care, including how to:

- Educate and prepare the community to deliver effective CPR
- Improve EMS response, EMS care and transition through hospital admission
- Organize Code Teams and Review Committees
- Coordinate Evaluation, Review, and Debrief Cardiac Arrests
- Deploy tools to improve quality of resuscitation (ETCO₂, Cerebral Oximetry, Ultrasound)
- Improve post-cardiac arrest care: Targeted Temperature Management, PCI, and ECMO.
- Effectively train, conduct mock codes, and comprehensive CQI

The Emergency Cardiovascular Update Conference (ECCU 2014) an international, comprehensive conference devoted to emerging science on all aspects of resuscitation and CPR follows on June 3-6, 2014. Find out more: <http://citizencpr.org/ECCU.aspx>

A must for Hospital Code Team Leadership!
